

## How to Fill Out Your Player Scoresheet

The Player Scoresheet is your personal record of your scores in each round. It also tells you the number of the table to which you are assigned for each round, and would be used if manual scoring became necessary. So, it is important to keep your Player Scoresheet with you throughout the competition. If your name is not pre-printed on the scoresheet, write it there, so if you and your scoresheet become separated you can be reunited.

After each game, enter 0, 1, or 2 points, depending on how you scored. This will also be done by the table scorekeeper after each game. Be sure you agree on the number of points you earned. The scorekeeper will initial your sheet after each game to indicate that agreement.

Total your points at the end of the round. The total will also be recorded by the table scorekeeper, who will initial the total on your scoresheet to indicate agreement.

## How to Fill Out the Table Scoresheet

The Table Scoresheet is the official record of scores for each player at a table for one round of play. Table Scoresheets are collected after they are complete and used to enter scores into the computerized scoring system.

At the competition, the Table Scoresheet has names pre-printed in the name spaces. If your name is the last one listed, you are the scorekeeper for the round. You are responsible for recording everyone's score accurately. If you are substituting for the player whose name is printed on the scoresheet or you are identified by a number instead of your name write your name in the name space.

After each game, enter 0, 1, or 2 points, depending on how each person scored. Be sure you and each player agree on the number of points each person earned. Initial each player's scoresheet *after each game* when you agree with their point total.

Total each person's points at the end of the round. Your total should agree with the total recorded by each player on his/her Player Scoresheet. Agreement is indicated by your initials in the box provided on each Player Scoresheet and by the player's initials on the Table Scoresheet.

*Remember that the Table Scoresheet is the official record. It should be initialed only when the player and the scorekeeper have agreed on the recorded total score. Once a player has initialed the Table Scoresheet, the results cannot be changed.*
